Below is a list of new policies and significant changes to existing policies within the Carolinas College Policy & Procedure Manual. They have been reviewed and approved according to the College's Policy Review and Approval policy. In operational policies, italics indicate new content that's been added in the most recent policy revision. Board policies, however, (Section 0), by board request, do not contain italics and need to be compared to archived policies to identify precise updates. For areas where Carolinas College does not have a policy, the college defaults to the relevant Atrium Health policy.

Click (or "control-click") on the policy name below to link directly to the policy.
This table briefly summarizes major changes in policies, procedures, job summaries, or personnel handbook entries. For details, consult the actual policy by clicking on the hyperlink provided. Policies list the individual/s responsible for reviewing. Carolinas College practice is to include the managers most directly accountable for policy compliance in the review process. In turn, managers are encouraged to involve their staff and faculty in the review process. Input from staff and faculty on any policy is welcome and does not necessarily need to coincide with a policy review date. Input should be provided to one's manager or to a person listed as a policy reviewer.

Policy	Brief Overview of Change	Effective Date
Course Enrollment Size	Updated to reflect the creation of an agreement with Cabarrus College for sharing general education courses	1/22
